JOURNAL OF ELECTROANALYTICAL CHEMISTRY AND INTERFACIAL ELECTROCHEMISTRY, VOLUME 245 (1988)

SUBJECT INDEX

Anilines,
electrochemical and electropolymerization reactions of undiluted ——— and pyrrole (McCarley et al.) 321

Bubble electrode,
the ——— — a new electrode for the combination of voltammetry, electrolysis and electron spin resonance spectrometry (Bagchi et al.) 105

Cadmium,
catalysis of the electrochemical reduction of ——— ions by chloride ions. A mechanistic study in mixed 1 *M* KF + KCl aqueous solutions at the dropping mercury electrode (Souto et al.) 167

Carbon,
electrocatalytic reactions in organized assemblies. Part V. Dehalogenation of 4,4′-dibromobiphenyl in cationic micelles at bare and clay-modified ——— electrodes (Rusling et al.) 331

Carbon dioxide,
reduction of ——— and CO to methane on Cu foil electrodes (Kim et al.) 223

Carbon monoxide,
infrared spectra of ——— adsorbed on palladium and platinum electrodes co-existing with another adsorbed species in acidic solution (Ikezawa et al.) 245
Reduction of CO_2 and ——— to methane on Cu foil electrodes (Kim et al.) 223

Channel electrodes,
on the transportation of theoretical equations or working curves for rotating disk electrodes. Comments on a paper by Unwin and Compton (Tokuda) 299
Relationship between mass transport to ——— and rotating disk electrodes (Unwin, Compton) 287
Reply to comments by Tokuda on our paper "The relationship between mass transport to ——— and rotating disk electrodes" (Compton, Unwin) 303

Charge transfer,
partial ——— in the underpotential deposition of metals. Part II. Mercury deposition on polycrystalline gold electrodes (Salié, Bartels) 21
Partial ——— in the underpotential deposition of metals. Part I. On the nature of the deposits and the kinetics of their formation (Salié) 1

Chloride,
catalysis of the electrochemical reduction of cadmium ions by ——— ions. A mechanistic study in mixed 1 *M* KF + KCl aqueous solutions at the dropping mercury electrode (Souto et al.) 167

Chronopotentiometry,
——— at a DME. Effects of electrode sphericity on the chronopotentiometric response of a catalytic mechanism (Galvez et al.) 61

Clay-modified carbon electrodes,
electrocatalytic reactions in organized assemblies. Part V. Dehalogenation of 4,4′-dibromobiphenyl in cationic micelles at bare and ——— (Rusling et al.) 331

Copper,
behaviour of some ———(II) salts in propylene carbonate. Standard electrode potential of the Cu^{2+}/Cu system at 25 °C (Pandey et al.) 123
Reduction of CO_2 and CO to methane on ——— foil electrodes (Kim et al.) 223

Cyclic voltammograms,
analysis of the ——— associated with deposition or precipitation of the electrochemical product (Aoki, Kato) 2[illegible]

Cytochrome *c*,
IR reflectance studies of electron transfer

promoters for ——— on a gold electrode (Niwa et al.) 275

4,4′-Dibromobiphenyl,
electrocatalytic reactions in organized assemblies. Part V. Dehalogenation of ——— in cationic micelles at bare and clay-modified carbon electrodes (Rusling et al.) 331

Electrode sphericity,
chronopotentiometry at a DME. Effects of ——— on the chronopotentiometric response of a catalytic mechanism (Galvez et al.) 61

Electron density,
——— at the metal–liquid interface (Salem) 307

Electron transfer promoters,
IR reflectance studies of ——— for cytochrome *c* on a gold electrode (Niwa et al.) 275

Exchange currents,
determination and characterisation of apparent ion- at PVC/water interfaces (Xie, Cammann) 117
Significance of ——— for the PVC/water interface (Armstrong) 113

Fe(edta),
voltammetry at microcylinder electrodes. Part VI. Second-order catalytic reaction of ——— with H_2O_2 (Aoki et al.) 39

Formic acid,
electrocatalytic oxidation of ——— on Pd + Pt alloys of different bulk composition in acidic medium (Pavese et al.) 145

Glutathione,
mediators for the oxidation of ——— and other biological thiols (Thackrey, Riechel) 131

Gold,
IR reflectance studies of electron transfer promoters for cytochrome *c* on a ——— electrode (Niwa et al.) 275
Partial charge transfer in the underpotential deposition of metals. Part II. Mercury deposition on polycrystalline ——— electrodes (Salié, Bartels) 21

Hexachloroacetone,
selective electrocatalytic reduction of ——— on a viologen polymer modified electrode in aqueous media (Coche, Moutet) 313

Hydrogen peroxide,
voltammetry at microcylinder electrodes. Part VI. Second-order catalytic reaction of Fe(edta) with ——— (Aoki et al.) 39

Inlaid disc microelectrode,
theory of electrochemical processes at an ——— under steady-state conditions (Bond et al.) 71

Iron,
electrochemical reduction of ———(II) complexes with {3-(2-pyridyl)-5,6-diphenyl-1,2,4-triazine} (El Jammal et al.) 201

Mass transport,
relationship between ——— to channel and rotating disk electrodes (Unwin, Compton) 287
Reply to comments by Tokuda on our paper "The relationship between ——— to channel and rotating disk electrodes" (Compton, Unwin) 303

Mercury,
catalysis of the electrochemical reduction of cadmium ions by chloride ions. A mechanistic study in mixed 1 *M* KF + KCl aqueous solutions at the dropping ——— electrode (Souto et al.) 167
Partial charge transfer in the underpotential deposition of metals. Part II. ——— deposition on polycrystalline gold electrodes (Salié, Bartels) 21
Voltammetric study of thiazolidine-4-carboxylic acid on ——— electrodes (Costa García, Tuñon Blanco) 157

Metal–liquid interface,
electron density at the ——— (Salem) 307

Methane,
reduction of CO_2 and CO to ——— on Cu foil electrodes (Kim et al.) 223

Micelles,
electrocatalytic reactions in organized assemblies. Part V. Dehalogenation of 4,4′-dibromobiphenyl in cationic ——— at bare and clay-modified carbon electrodes (Rusling et al.) 331

Microcylinder electrodes,
voltammetry at ———. Part VI. Second-order catalytic reaction of Fe(edta) with H_2O_2 (Aoki et al.) 39

Oxygen,
electrocatalytic effects of redox polymer films on the reduction of ——— on silicon semiconductors (Holdcroft et al.) 191

Palladium,
electrocatalytic oxidation of formic acid on ——— + Pt alloys of different bulk composition in acidic medium (Pavese et al.) 145
Infrared spectra of CO adsorbed on ——— and platinum electrodes co-existing with another adsorbed species in acidic solution (Ikezawa et al.) 245

Platinum,
electrocatalytic oxidation of formic acid on Pd + ——— alloys of different bulk composition in acidic medium (Pavese et al.) 145
Electrochemical reactivity of 2,2′5,5′-tetrahydroxybiphenyl and related compounds adsorbed at ——— (111) surfaces: studies by EELS, LEED, Auger spectroscopy and cyclic voltammetry (Salaita et al.) 253
Infrared spectra of CO adsorbed on palladium and ——— electrodes co-existing with another adsorbed species in acidic solution (Ikezawa et al.) 245

Polymer films,
electrocatalytic effects of redox ——— on the reduction of O_2 on silicon semiconductors (Holdcroft et al.) 191

Polyvinylchloride,
determination and characterisation of apparent ion-exchange currents at ———/water interfaces (Xie, Cammann) 117
Significance of exchange currents for the ———/water interface (Armstrong) 113

Potassium chloride,
catalysis of the electrochemical reduction of cadmium ions by chloride ions. A mechanistic study in mixed 1 *M* KF + ——— aqueous solutions at the dropping mercury electrode (Souto et al.) 167

Potassium fluoride,
catalysis of the electrochemical reduction of cadmium ions by chloride ions. A mechanistic study in mixed 1 *M* ——— + KCl aqueous solutions at the dropping mercury electrode (Souto et al.) 167

Propylene carbonate,
behaviour of some copper(II) salts in ———. Standard electrode potential of the Cu^{2+}/Cu system at 25 °C (Pandey et al.) 123

{3-(2-Pyridyl)-5,6-diphenyl-1,2,4-triazine},
electrochemical reduction of iron(II) complexes with ——— (El Jammel et al.) 201

Pyrrole,
electrochemical and electropolymerization reactions of undiluted anilines and ——— (McCarley et al.) 321

Rotating disk electrodes,
on the transportation of theoretical equations or working curves for ——— to those for channel electrodes and vice versa. Comments on a paper by Unwin and Compton (Tokuda) 299
Relationship between mass transport to channel and ——— (Unwing, Compton) 287
Reply to comments by Tokuda on our paper "The relationship between mass transport to channel and ———" (Compton, Unwin) 303

Silicon,
electrocatalytic effects of redox polymer films on the reduction of O_2 on ——— semiconductors (Holdcroft et al.) 191

2,2′,5,5′-Tetrahydroxybiphenyl,
electrochemical reactivity of ——— and related compounds adsorbed at Pt (111) surfaces: studies by EELS, LEED, Auger spectroscopy and cyclic voltammetry (Salaita et al.) 253

Thiazolidine-4-carboxylic acid,
voltammetric study of ——— on mercury electrodes (Costa García, Tuñon Blanco) 157

Thiols,
mediators for the oxidation of glutathione and other biological ——— (Thackrey, Riechel) 131

Underpotential deposition,
partial charge transfer in the ——— of metals. Part II. Mercury deposition on polycrystalline gold electrodes (Salié, Bartels) 21
Partial charge transfer in the ——— of metals. Part I. On the nature of the deposits and the kinetics of their formation (Salié) 1

Viologen,
selective electrocatalytic reduction of hexachloroacetone on a ——— polymer modified electrode in aqueous media (Coche, Moutet) 313

JOURNAL OF ELECTROANALYTICAL CHEMISTRY AND INTERFACIAL ELECTROCHEMISTRY

Vol. 245 Nos. 1 and 2 April 25, 1988

CONTENTS

Partial charge transfer in the underpotential deposition of metals. Part I. On the nature of the deposits and the kinetics of their formation
G. Salié (Berlin, G.D.R.) 1

Partial charge transfer in the underpotential deposition of metals. Part II. Mercury deposition on polycrystalline gold electrodes
G. Salié and K. Bartels (Berlin, G.D.R.) 21

Voltammetry at microcylinder electrodes. Part VI. Second-order catalytic reaction of Fe(edta) with H_2O_2
K. Aoki, M. Ishida and K. Tokuda (Yokohama, Japan) 39

Analysis of the cyclic voltammograms associated with deposition or precipitation of the electrochemical product
K. Aoki (Yokohama, Japan) and N. Kato (Tokyo, Japan) 51

Chronopotentiometry at a DME. Effects of electrode sphericity on the chronopotentiometric response of a catalytic mechanism
J. Galvez, F. Robles, J. Zapata (Murcia, Spain) and S.-M. Park (Albuquerque, NM, U.S.A.) ... 61

Theory of electrochemical processes at an inlaid disc microelectrode under steady-state conditions
A.M. Bond, K.B. Oldham and C.G. Zoski (Waurn Ponds, Australia) 71

The bubble electrode — a new electrode for the combination of voltammetry, electrolysis and electron spin resonance spectrometry
R.N. Bagchi, A.M. Bond (Waurn Ponds, Australia), F. Scholz and R. Stösser (Berlin, G.D.R.) .. 105

The significance of exchange currents for the PVC/water interface
R.D. Armstrong (Newcastle upon Tyne, Great Britain) 113

The determination and characterisation of apparent ion-exchange currents at PVC/water interfaces
S.-L. Xie and K. Cammann (Garching, F.R.G.) 117

Behaviour of some copper(II) salts in propylene carbonate. Standard electrode potential of the Cu^{2+}/Cu system at 25°C
R.N. Pandey, A.K. Srivastava and M.G. Bapat (Varanasi, India) 123

Mediators for the oxidation of glutathione and other biological thiols
R.D. Thackrey and T.L. Riechel (Oxford, OH, U.S.A.) 131

Electrocatalytic oxidation of formic acid on Pd + Pt alloys of different bulk composition in acidic medium
A. Pavese, V. Solis (Córdoba, Argentina) and M.C. Giordano (La Plata, Argentina) 145

A voltammetric study of thiazolidine-4-carboxylic acid on mercury electrodes
A. Costa Garcia and P. Tuñon Blanco (Asturias, Spain) 157

The catalysis of the electrochemical reduction of cadmium ions by chloride ions. A mechanistic study in mixed 1 *M* KF + KCl aqueous solution at the dropping mercury electrode
R.M. Souto, M. Saakes, M. Sluyters-Rehbach and J.H. Sluyters (Utrecht, The Netherlands) ... 167

Electrocatalytic effects of redox polymer films on the reduction of O_2 on silicon semiconductors
S. Holdcroft, S.R. Morrison and B.L. Funt (Vancouver, Canada) 191

Electrochemical reduction of iron(II) complexes with (3-(2-pyridyl)-5,6-diphenyl-1,2,4-triazine)
A. El Jammal, E. Graf and M. Gross (Strassburg, France) 201

Reduction of CO_2 and CO to methane on Cu foil electrodes
J.J. Kim, D.P. Summers and K.W. Frese, Jr. (Menlo Park, CA, U.S.A.) 223

Infrared spectra of CO adsorbed on palladium and platinum electrodes co-existing with another adsorbed species in acidic solution
Y. Ikezawa, H. Saito, M. Yamazaki and G. Toda (Tokyo, Japan) 245

(continued on p. 3 of cover)

Contents (*continued*)

Electrochemical reactivity of 2,2′,5,5′-tetrahydroxybiphenyl and related compounds adsorbed at Pt (111) surfaces: studies by EELS, LEED, Auger spectroscopy and cyclic voltammetry
G.N. Salaita, L. Laguren-Davidson, F. Lu, N. Walton, E. Wellner, D.A. Stern, N. Batina, D.G. Frank, C.-H. Lin, C.S. Benton and A.T. Hubbard (Cincinnati, OH, U.S.A.) 253

IR reflectance studies of electron transfer promoters for cytochrome *c* on a gold electrode
K. Niwa, M. Furukawa and K. Niki (Yokohama, Japan) 275

The relationship between mass transport to channel and rotating disk electrodes
P.R. Unwin and R.G. Compton (Oxford, Great Britain) 287

Short communications

On the transposition of theoretical equations or working curves for rotating disk electrodes to those for channel electrodes and vice versa. Comments on a paper by Unwin and Compton
K. Tokuda (Yokohama, Japan) 299

A reply to comments by Tokuda on our paper "The relationship between mass transport to channel and rotating disk electrodes"
R.G. Compton and P.R. Unwin (Oxford, Great Britain) 303

Electron density at the metal–liquid interface
R.R. Salem (Moscow, U.S.S.R.) 307

Selective electrocatalytic reduction of hexachloroacetone on a viologen polymer modified electrode in aqueous media
L. Coche and J.-C. Moutet (Saint Martin d'Hères, France) 313

Preliminary notes

Electrochemical and electropolymerization reactions of undiluted anilines and pyrrole
R.L. McCarley, M. Morita, K.O. Wilbourn and R.W. Murray (Chapel Hill, NC, U.S.A.) 321

Electrocatalytic reactions in organized assemblies. Part V. Dehalogenation of 4,4′-dibromobiphenyl in cationic micelles at bare and clay-modified carbon electrodes
J.F. Rusling, C.-N. Shi and S.L. Suib (Storrs, CT, U.S.A.) 331
